25X1

1. A series of aerials have been erected around Budapest. They are about 20 m. high and are generally believed to be radio antennae. The circle of aerials starts about 35 to 40 km. up the right bank of the Danube north of Budapest, through the mountains, and through Szabadsághegy-Remetehegy around to the Danube south of the town. The circle continues on the same radius on the left bank of the river.
2. It is proposed to build a wintering port in the branch of the Danube near Megyer during 1953, which will be used by the Hungarian Danube Police units. A new detention camp has been built between Megyer and Alsógöd.
